

Hargassner Common Spares Price list

Hargassner UK Ltd has compiled a list of front line instrumentation parts. It is our recommendation that you as a Hargassner UK Ltd Registered Installer carry in stock, this basic list of parts to allow for professional and competent commissioning of the boilers. Without the necessary spares, the single failure of one of these items will completely stop a boiler upon their failure.

Although their failure is highly unlikely, there is still a possibility that one of these parts might fail on initial switch-on of the boiler. The parts listed below are purchasable individually or as a discounted "Spares -kit", that can be topped up as the parts are replaced.

The suggested spares are suitable for ECO, WTH and Pellet Classic boilers from 9 to 199kW with wood chip or pellet fuel
